## FEATURES

-  This installation system consists in assembling the boards with slots and cuts on their edges by applying a slight pressure on the boards. The boards are then bonded with white glue. Tools are needed for the installation.
-  Applying a color oil or varnish on the wood surface in order to get different color ranges.
-  L'ANTIC COLONIAL's varnishing, in two finishes, APRESTO (gloss) and APRESTO MATE (matte), provides a unique surface quality that satisfies the most demanding requirements. Advantages: It achieves the highest cleanliness because, since the pores are sealed, dirt and dust remain on the surface and can be easily cleaned.
-  Is suitable for installing on water radiant heating
-  It is necessary to apply adhesive for installing it.
-  There are considerable color changes between pieces.
-  Material from a European country.
-  5 mm
-  Slight smoothing of the wood using a brush to achieve a surface with a slight relief.

-  Material from an Asian country.
-  Structure formed by an upper layer that shows the noble aspect of the material, an intermediate layer of wood of different typology, depending on the collection, or HDF board that compensates the tensions between the different parts and a lower plywood that provides dimensional stability.
